## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of Group I, claims 21-40, in the reply filed on September 17, 2004 is acknowledged. Claims 41-51 have been cancelled.

This application contains claims directed to the following patentably distinct species of the claimed invention: the first species as shown in Figure 1, the second species as shown in Figure 3, the third species as shown in Figure 4, and the fourth species as shown in Figures 7 and 8.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Mr. Dana Tangren on October 6, 2004 a provisional election was made without traverse to prosecute the invention of the first species as shown in Figure 1, claims 21-30 and 33-40. Affirmation of this election must be made by applicant in replying to this Office action. Claims 31 and 32 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Allowable Subject Matter***

Claims 21-40 are allowed.

The following is an examiner's statement of reasons for allowance: the art of record when considered alone or in combination neither renders obvious an apparatus for compressing at least a portion of a patient's skeleton, joints and/or spine during imaging, the apparatus comprising:

- (a) a first base member;

(b) a pair of flexible shoulder straps connected to the first base member and adapted to bear against the shoulders of the patient;

(c) a resilient member formed to the first base member, the resilient member being resiliently compressible or resiliently stretchable; and

(d) a foot plate coupled with the resilient member such that the foot plate can be selectively moved relative to the first base member to resiliently compress or resiliently stretch the resilient member, the foot plate being adapted to receive the feet of the patient when the flexible shoulder straps bear against the shoulders of the patient.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S Patent No. 5,179,746 (Rogers) discloses a stretcher comprising elements as recited in applicant's claims but does not teach a resilient member.

U.S. Patent No. 6,026,526 (Payman) discloses a birthing bed comprising elements as recited in applicant's claims but lacks the teaching of a pair of flexible shoulder straps.
